Hi Robert,

Please see below OPP's response to the Audubon Magazine inquiry on sulfoxaflor. OGC reviewed and contributed to these responses. Thanks.

Importance: High

Hi Darlene,

Here is our response to this inquiry. Meredith Laws (RD), Ryan Mroz (EFED), and Erin Koch (OGC) reviewed and contributed to these responses. The stated deadline is tomorrow, but the reporter asked if we could get something to them this morning.

AUDUBON MAGAZINE
ANDY MCGLASHEN
DDL FRIDAY, JULY 19

1) As EPA's press release notes, "In 2016, following a 2015 decision of the Ninth Circuit Court of Appeals vacating the registration of sulfoxaflor citing inadequate data on the effects on bees." How is EPA now able to register sulfoxaflor without conflicting with that court ruling? Does this mean new data have become available showing sulfoxaflor is safe for bees?

Ex. 5 Deliberative Process (DP)

2) If so, are those studies or data public? Where can they be found?

Ex. 5 Deliberative Process (DP)

3) How does EPA square this registration of sulfoxaflor with the agency's assessment that the insecticide is "very highly toxic" to bees?

Ex. 5 Deliberative Process (DP)

4) It's my understanding that EPA is reevaluating neonicotinoids and has halted any new approvals until those reviews are complete, but that those reviews are ongoing and the agency has not yet issued any related restrictions of those pesticides. Is that correct?

+++++

Greetings,

I'm working on a story for *Audubon* magazine about EPA's registration last week of sulfoxaflor, and hoped you could provide answers to a few questions. If it's at all possible to provide input by Thursday morning, that would be a big help.

My questions are below.

Thank you very much for your help!
-Andy

-As EPA's press release notes, "In 2016, following a 2015 decision of the Ninth Circuit Court of Appeals vacating the registration of sulfoxaflor citing inadequate data on the effects on bees." How is EPA now able to register sulfoxaflor without conflicting with that court ruling? Does this mean new data have become available showing sulfoxaflor is safe for bees?

-If so, are those studies or data public? Where can they be found?

-How does EPA square this registration of sulfoxaflor with the agency's assessment that the insecticide is "very highly toxic" to bees?

-It's my understanding that EPA is reevaluating neonicotinoids and has halted any new approvals until those reviews are complete, but that those reviews are ongoing and the agency has not yet issued any related restrictions of those pesticides. Is that correct?
